Industrial Rubber Roller Repair Company

A Passion for Innovation, with the
Expertise for Achievement

Electro-Coatings is the specialist in reconditioning worn or damaged industrial rolls. Our Berkeley plant specializes in the design, fabrication, and reconditioning of many types of rolls and cylinders. We can furnish rolls in crepe, crowned, grooved, high polish, matte and micro polished surface finishes, Complete reconditioning of your corrugating, glue, metering rolls and rotor gravure cylinders.

Our innovation and skills offer integrated facility services in a wide variety of machinery parts, hydraulic equipment, turbine rotor, pump repair, paper, box, steel mill, printing and plastic film industries, just to name a few.

With the latest introduction of our established rubber roller precision equipment, we have proven, once again, how our high quality repairs and covering technology will **reduce your costs, improve your efficiency, and increase quality in your plant operations.**

We've Got You Covered

ECCA's "Yes, We Can" attitude offers over 70 years of combined plating and roller experience, research, innovation, technology, and quality control – producing roll coverings that satisfy a multitude of industry requirements.

Industries Served

- Abrasive products
- Advertising displays
- Aluminum foil
- Aluminum strip processing
- Asphalt felt & Asphalt felt coating
- Automobiles & Parts
- Boat builders
- Building board mills
- Building paper
- Canvas
- Coated fabrics
- Continuous metal anodizing
- Converted paper goods & products
- Conveying equipment
- Copper strip processing
- Corona treating
- Cotton processing & fabrics
- Embossing foil & non-wovens
- Embossing paper
- Embossing textiles
- Fabricated rubber products
- Fabricated textile
- Farm machinery
- Felt goods
- Fiber cans
- Fiber drums
- Fiber tubes
- Fiberglass products
- Film lines
- Floatglass
- Food
- Gaskets
- Glass conveyors
- Glass mirrors
- Glue applicators
- Gypsum board
- Industrial ovens
- Insulation board
- Knitting machines
- Laundry equipment
- Lead foil
- Leather finishing & tanning
- License plates
- Lighting fixtures
- Linoleum
- Lockers
- Metal coating
- Metal coil coaters
- Metal engraving
- Metal household furniture
- Metal office furniture
- Metal polishing
- Metal stamping
- Metalworking equipment
- Millwork
- Packaging
- Paper bags
- Paper coating
- Paper & paperboard mills
- Photographic film & tapes
- Pipe laying equipment
- Plastic bags
- Plastic coatings
- Plastic film
- Plastic moldings
- Plastic sheet
- Plastic tile
- Plywood
- Pressed board
- Printed circuits
- Recording tapes
- Recreational vehicles
- Sanitary paper products
- Shades
- Shelving
- Shoes
- Signs
- Special machinery
- Stainless steel (rolling)
- Steel flush doors
- Steel pickling lines
- Steel strip processing & rolling
- Store fixtures
- Television cabinets
- Textile bags
- Textile dyers
- Textile finishers
- Textile machinery
- Tires
- Venetian blinds
- Video tapes
- Wallpaper
- Wire cloth & screen
- Wood flush doors
- Wood house & office furniture
- Wood partitions
- Wood products
- Woodworking machinery
- Woven felts

Truck Route

Oregon Trail: I-5 Corridor

"YES, We Can" – Free pickup when our own Home Team drivers are in your neighborhood.* Just give us a call to schedule it – *it's that simple.*

800-310-2549

Standard Pickup Schedule:

First week of each month | Wed-Thurs-Fri

Need to schedule a Hot Shot pickup? Give us a call for low cost expedited services.

*Please be prepared to provide a forklift if necessary to load your shipment onto our truck. Package must be palletized or packaged securely for safe shipping prior to pickup. Any questions, please call.

Industrial Roll Coverings

Core Services

- Design
- Core building
- Core repair
- Journal repair
- Hard surfacing
- Static balancing
- Dynamic balancing
- Bearings

Finishes

- Smooth
- Rough
- Grooved
- Crowned
- Barreled
- Textured
- Patterned
- Long nap (fiber-filled)
- Short nap

Capabilities/Capacity

For the every-growing roller and hydraulic services industry, we recondition rollers and hydraulic piston rods utilizing CNC grinding equipment.

Our equipment is capable of handling rolls or shafts up to 22' in length and 60" diameter.

- Grinding 60" OD X 22' between centers
- Lathe 32" swing, 17' centers *max. capacity*
- Plating 5' diameter X 20' length *max. capacity*
- Lift 20 tons *max. capacity*

Field Repair Service

"YES, We Can!" ...*come to you.* We've expand our roller repair services to those whose rollers are not feasible to send to our plant.

Our technique involves selectively depositing metal on small areas of a tool, roll, or part. It is not necessary to completely immerse the part in a plating solution hence it is a field repair service.

This repair procedure is useful in returning worn, scored, or corroded surfaces to the original dimensions without costly disassembly. In most cases, there is no need for a re-machining or regrinding operation after plating, thus minimizing the cost of the repair.
